
Snitch core / software
issues OMERGE; retains tile scheduling
OMERGE control path
decode, demux, issue arbiter
Existing Spatz / RVV
standard vector path
Scalar SMU
per-row m, l recurrence
emits $w_{\text{old}}, w_{\text{tile}}$
RVV output update
$O'[j] = w_{\text{old}} O[j]$
$+ w_{\text{tile}} O_t[j]$
Shared TCDM (128 KiB, 16 banks)
FP32 scalar arrays [N]: state, tile statistics, and weights
output tiles [N,D]
